B Tech Artificial Intelligence and Machine Learning

🐙 [GitHub Profile](#)

🌐 [LinkedIn Profile](#)

Education

- Mukesh Patel School of Technology, Management and Engineering, Shirpur** 2021 - present
B Tech Artificial Intelligence CGPA/Percentage: 3.07/4
- Air Force Golden Jubilee Institute, New Delhi** 2021
Class XII CGPA/Percentage: 85
- Air Force School Chandan Nagar, Pune** 2019
Class X CGPA/Percentage: 85.2

TECHNICAL SKILLS and INTERESTS

Languages: Python, C++, R, SQL

Libraries: NumPy, Pandas, Matplotlib, NLTK, keras, tensorflow, scikit-learn, openCV, seaborn

Softwares:: AutoCAD, Visual Studio, Adobe Photoshop, COLAB, MySQL, Cisco Packet Tracer, SQL Lite

Concepts: Deep Learning, Machine Learning, OOPs, Data Structures and Algorithms, Artificial Intelligence, NLP, Database Management, Signal & Image processing, Computer Network, App Development, Biometrics, Computer Vision, Robotic Process Automation, Robotics, Software Engineering, Big Data, LLM, Data Wrangling

EXPERIENCE

- Oracle Apex Consultancy** May'2024-July;2024
Oracle Apex Consultancy Intern- Pune

PROJECTS

- RAG based LLM Query System** 2025
Developed a Retrieval-Augmented Generation (RAG) system using Flask, ChromaDB, and Vue.js to process and query documents via multiple LLM APIs (OpenAI, Gemini, Anthropic, etc.). Implemented document upload, processing, vector-based search, and LLM querying with a dynamic frontend using Vuetify. Enhanced efficiency by integrating a structured repository and API settings for flexible model selection.
- Music Recommendation System using Speech Emotion Recognition** 2024
-Concepts: SER using 1D CNN, SVM, Deep learning
- Advanced Stock Price Prediction Using LSTM** 2023
Implemented an advanced stock price prediction model using LSTM to predict stock prices and visualize the candles of the stock price chart.
– Concepts: Python, LSTM, Deep learning, Neural Networks
- Fake News Detection** 2023
Implemented Fake News detection model using RandomForestClassifier with TF-IDF vectorization. Detects if a given news articles is fake or not.
– Concepts : Python, Machine Learning, RandomForest Classifier, TF-IDF vectorization
- Text Generation using RNN** 2022
A deep learning project that leverages RNNs to generate text in the style of William Shakespeare. This project employs TensorFlow for building and training the RNN model on a dataset consisting of Shakespeare's literary works, enabling the generation of coherent and contextually relevant text sequence.
- Car Price Prediction** 2022
– The car price prediction project utilizes machine learning algorithms to analyze various factors such as brand, model, mileage, age, and condition of the car to predict its market value accurately.
- Spam Detection** 2023
The spam detection project employs machine learning techniques to distinguish between legitimate messages and spam emails or texts.

-Sales Prediction

2022

The sales prediction project utilizes data analysis and machine learning algorithms to forecast future sales for a particular product or service

Technical Courses

- Machine Learning with Python- Cognitive Class IBM skills network
- Supervised Machine Learning: Regression and Classification- Stanford Online
- Introduction to Generative AI- Coursera
- Introduction to Deep Learning- Infosys
- Prompt Engineering- Cognitive Class IBM skills network

Positions of Responsibility

- Coding Club, NMIMS- Technical Core

2022-23

CO-CURRICULAR ACTIVITIES

- Won Girls Basketball, NMIMS Sports Fest

2024

COMMUNITY SERVICE

- Participant and part of organizing committee for AWWA, Pune
